### About IMPACT Health Physiotherapy and Sports Injury Clinics in Innisfail and Didsbury

The founding vision of IMPACT Health Physiotherapy and Sports Injury Clinics was for a complete advanced rehab service all under one roof. Today, we are a fast-growing physiotherapy clinic, one of the fastest growing groups in all of Alberta.

IMPACT Health Physiotherapy and Sports Injury Clinic initially launched as a small practice in Cold Lake back in September 2017. In less than 4 years, the IMPACT Health group has expanded from that **Cold Lake** location, to add **Bonnyville, St. Paul, Edmonton, Innisfail, Didsbury, Brooks, and Medicine Hat**.

Every team member here at IMPACT Health is dedicated to ensuring you receive the latest evidence-based care, with the most modern technology. We focus on a holistic approach to allow you to receive a customized program of care, so you heal quickly and effectively.

### Physiotherapy and Sports Injury in Innisfail and Didsbury

We are well-known for in-depth assessments and our holistic approach as we determine the underlying cause of your pain and then treat it effectively. We treat the cause, not just symptoms. That makes a significant difference to many patients who feel long-term relief from acute and chronic pain for the first time.

IMPACT sees only 2 patients each hour, because we believe you deserve one-on-one care with an experienced, licensed physiotherapist performing your therapy. Your therapist also educates you about what is happening in your body to encourage you to partner in your care.
